WHAT IS A WEDDING WEBSITE?

A wedding website is the 21st century solution to wedding invitations. Just tell your guests your site name eg www.janeandjohnwedding.com and you can be sure they have all the details for your big day. Include everything from travel and accommodation options, local attractions, on-the-day logistics, your gift list, menu options and much more.

WHY DO YOU NEED ONE?

Creating a wedding website is the most effective way to ensure your guests have all the information they need for your big day. It also simplifies administrative tasks to make the organisation of your wedding easier. It is especially helpful if you are planning a destination wedding abroad.

WHY USE SIMPLE WEDDING WEBSITES?

We do all the techy stuff (and all the other work) for you. Web hosting, buying the domain name, website security / privacy and making sure everything looks great on mobiles, laptops, PCs... We figure you have enough to do already without learning how to code a website!

YOUR ONLY JOB: TELL US ABOUT YOUR DAY

And don't worry, if plans aren't finalised or things need to change, it's easy to update your website with new information. We offer unlimited revisions, so your website can be as flexible as your plans.

YOUR GUESTS CAN RSVP ONLINE

No more waiting for the postman or checking emails. Instead, collect RSVPs on your website. You will get an instant notification of each new response and can download a spreadsheet of all your guests in a couple of clicks. Combine with our e-Invitation service for the easiest way to manage your guestlist.

UNIQUE TOUCHES & SPECIAL FEATURES

There are loads of other great features your website can include: an online photo gallery where guests can upload and share their pictures, links to your wedding gift list(s) and even the option for your guests to make secure, online payments to your bank account or to a selected charity.
